

Nebraska is the same as that confronted by the federal government, and it is not. People in Columbia are not going to say Nebraska is a good place to set up operations so we will make sure by going up the Missouri River or going up to Canada and then coming down the Missouri River, drop all this stuff off in Omaha, Nebraska, and use this as a distribution point because it is in the heartland of the United States. That is preposterous and it is ridiculous. The people offering this bill don't even know what is going on and Senator Hoagland, himself, said he hasn't had much experience in this area so he blames the committee. This bill was slid out when I wasn't there and I know that I should be at every meeting, but I was not there and that is how they were able to get it out, as they do a lot of these bills. And I don't blame them. I had compared it to what Irsay did when he slipped the Baltimore football team, the NFL Baltimore Colts, out of Baltimore under cover of darkness. That is what they did and now they are out on the floor and they don't want to explain what they did or why they did it. And they want to say that Senator Chambers is going to discuss the bill and make...

SPEAKER NICHOL: One minute.

SENATOR CHAMBERS: ...you discuss it so you will understand what is going on.

SPEAKER NICHOL: One minute.

SENATOR CHAMBERS: I have had my ten minutes?

SPEAKER NICHOL: They apologize. You have only had five.

SENATOR CHAMBERS: Don't be blaming them.

SPEAKER NICHOL: Well, sure I blame them, it was their fault.

SENATOR CHAMBERS: Okay. At any rate, if you are going to put this kind of legislation into the law because the federal government has it, you are going to have to modify it to fit Nebraska. Senator Pirsch already talked to you about a number of other states that have provisions dealing in this area but she immediately pointed out that this provision is different from theirs. Mr. Chairman...
